Art Unit: 1771

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the great majority of its disclosure, does not reasonably provide enablement for the following two particular aspects of the disclosure, one of which is also found in the claims and both of which are set forth below. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. More particularly, as has been added to claim 1, lines 2-4 the limitation found also in the specification at page 5, lines 19-21 that the silicone adhesive layer is "a heat curable chain-like organopolysiloxane and a solid silicone resin" is not believed to be enabling to one of ordinary skill, particularly with respect to just what is meant by a "solid silicone resin". Additionally, although not found in the claims the limitation found at page 5, lines 15-16, as well as page 3, lines 19-20 (and perhaps elsewhere) of the specification which states that the silicone adhesive layer is incompatible with the die bonding layer would appear to the Examiner to make the claimed dicing/die bonding adhesive tape inoperable in its intended environment. Clarification is requested.
3. The remaining rejections of record have been withdrawn as being inadequate in view of applicants' Response.
